

WEEK-1 PROJECT – Coffee Shop Sales Analysis

Final Summary

1. Cleaning problems found

- Date and Time were stored in a single timestamp column.
- 90 duplicate values were found.
- Some rows had blank store_location.
- Size column had spelling error, blank size values.
FINDING : Largeee – 169, Smalll - 472
- There were unnecessary columns like product_id, store_id and original timestamp.

2. Dashboard

KPI :

- Total Revenue : ₹ 6,98,812.33
- Total Orders : 60,344.00
- Total Units Sold : 2,14,470
- Average Bill : ₹ 4.69
- Top Product : Ethiopia

3. Top 5 insights

- Manhattan generates the highest revenue → Prioritize premium promotions in this store.
- Large size drinks contribute significantly to revenue → Upsell Regular to Large.
- Orders with Qty > 3 are low → Promote group combo deals to increase basket size.
- Revenue distribution across stores is balanced → Maintain uniform inventory allocation.
- Coffee dominates revenue contribution → Focus marketing on coffee-based combos.

4. Conclusion & Recommendations

Conclusion:

The sales analysis reveals key revenue drivers and operational patterns. Coffee is the top-performing category, with peak transactions during morning hours (8-9 AM). Manhattan leads in revenue, and Large/Regular drink sizes dominate beverage sales. Mid-year months, especially June, see stronger performance. Overall, the business shows stable store performance with opportunities for growth tied to specific times and products.

Recommendations:

- Increase staffing during peak morning hours to maximize revenue capture and reduce service delays.
- Strengthen coffee-focused promotions through combo offers and loyalty incentives.
- Encourage upselling to Large sizes to increase average transaction value.
- Launch targeted campaigns during high-performing months and replicate successful strategies in slower periods.
- Introduce bundle offers to improve basket size and increase multi-item purchases.
